

Tips to Avoid an HCC Diagnosis Mismatch

1. Limit diagnosis codes to 12 per encounter.
 - Example: The codes in spots 13 and 14 (and so on) will not be included in the claim. If an HCC code is placed here, the Diagnosis Mismatch will appear during the patient's next visit.
2. Place codes with an HCC designation higher up in the Visit Diagnosis listing.
 - Example: Notice that the diagnosis codes with an HCC designation are higher up on the diagnosis listing (2 through 10) to avoid risking a mismatch.

HCC (HCC Advisory: 1)

The following diagnoses haven't been addressed during a visit this year. Review each diagnosis and determine whether it still applies to the patient and should be added as a visit diagnosis. You can also add the diagnosis to the problem list.
